

One Click Installation

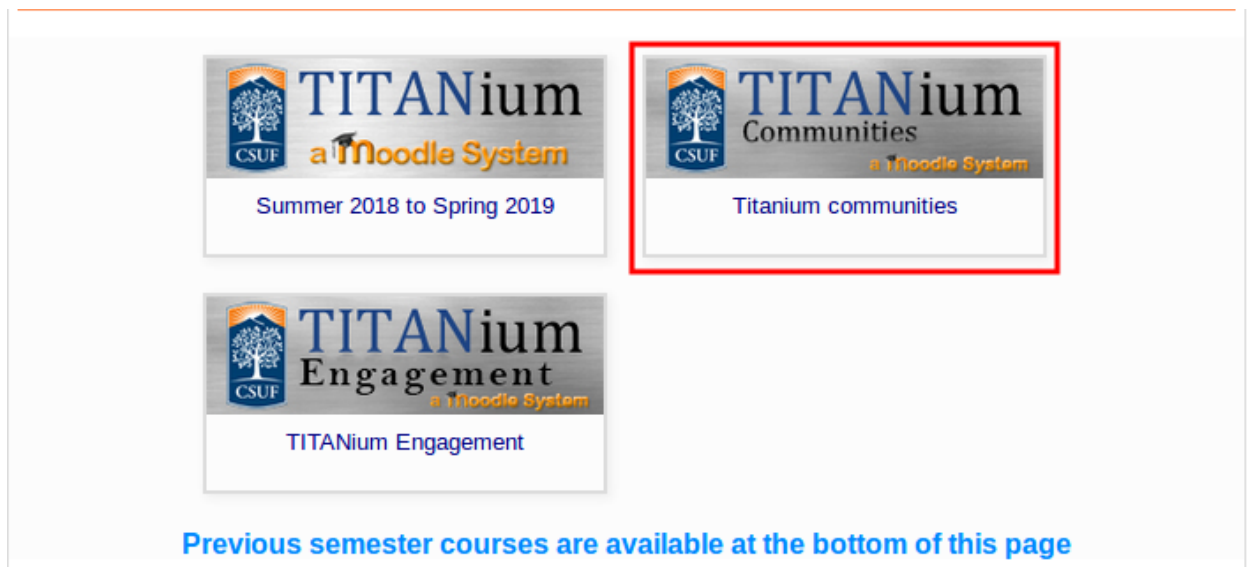

1. Open up your browser window and go to your CSUF Portal:

2. Go to left hand corner and click on Titanium:

3. Navigate to Communities:

4. If you are not enrolled in the Tuffix Community, please follow [these steps](#):
5. Head over to the Tuffix Students Community:

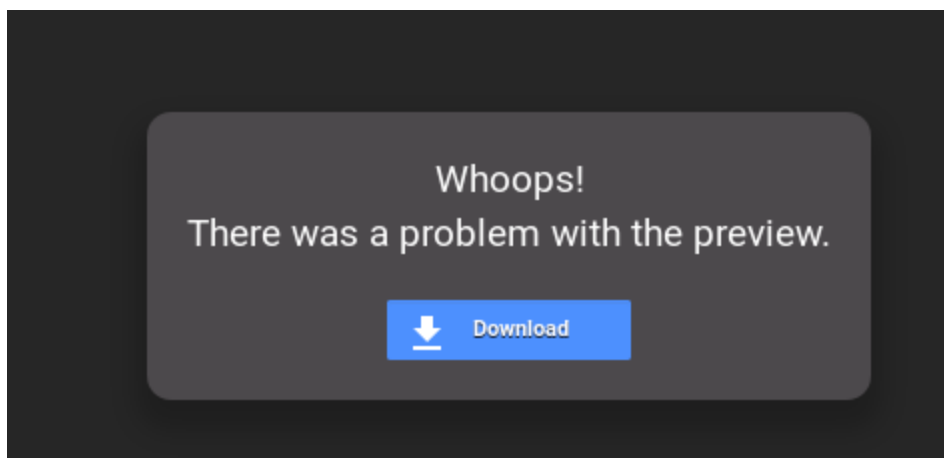

6. You will find a header called “Tuffix VM .ova Files” and click the top link. The links will be variable so do not worry if this not the first link for you:

Tuffix VM .ova Files

 Tuffix 2018-Summer Beta 2.ova

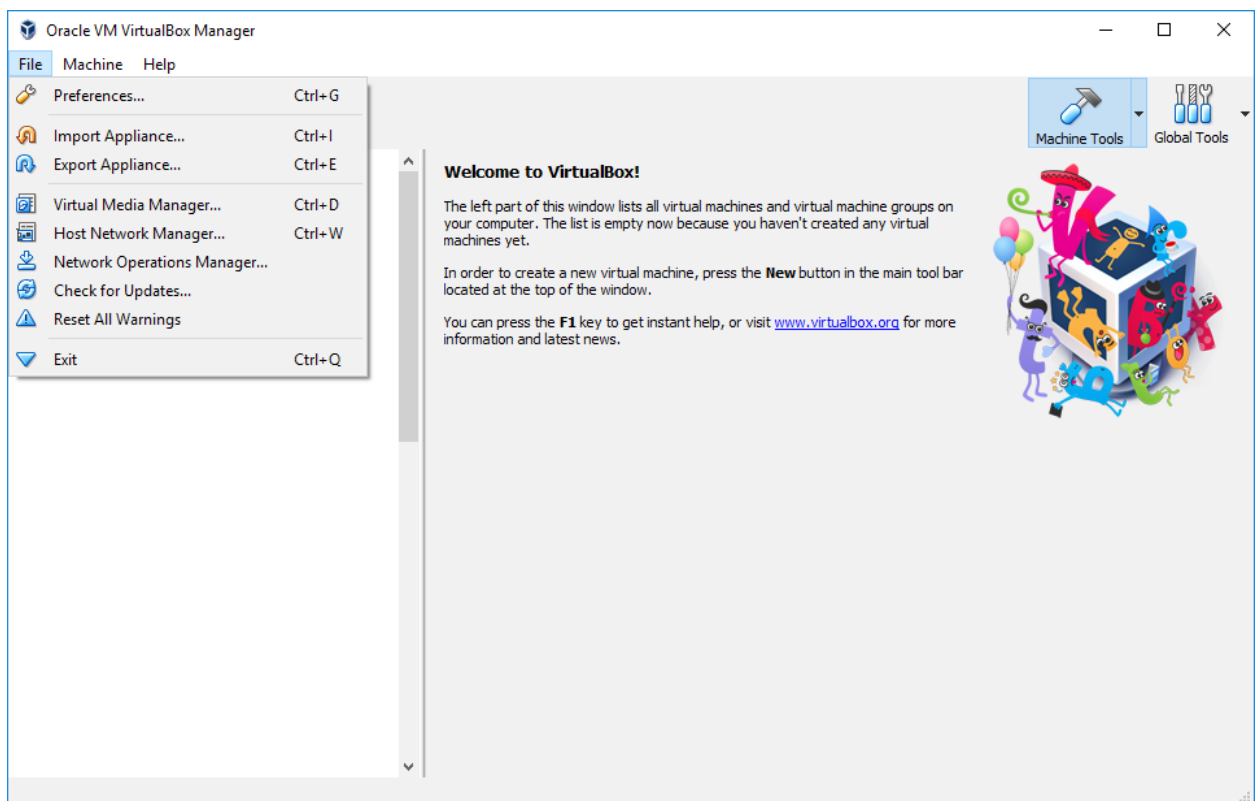

10 GB, SHA-256: a0f2dc62824809aa70afad4f1500d97ffbbb8a6a31009cb4d46aac88ec87781f

-
7. You will be redirected to a Google Drive page and you need to click download:

8. Again you will see a page telling you it cannot scan for viruses and that okay:

9. This will take a while depending on your computer and internet speed so sit tight
10. Once it is done downloading, proceed to open VirtualBox and click the File drop down:

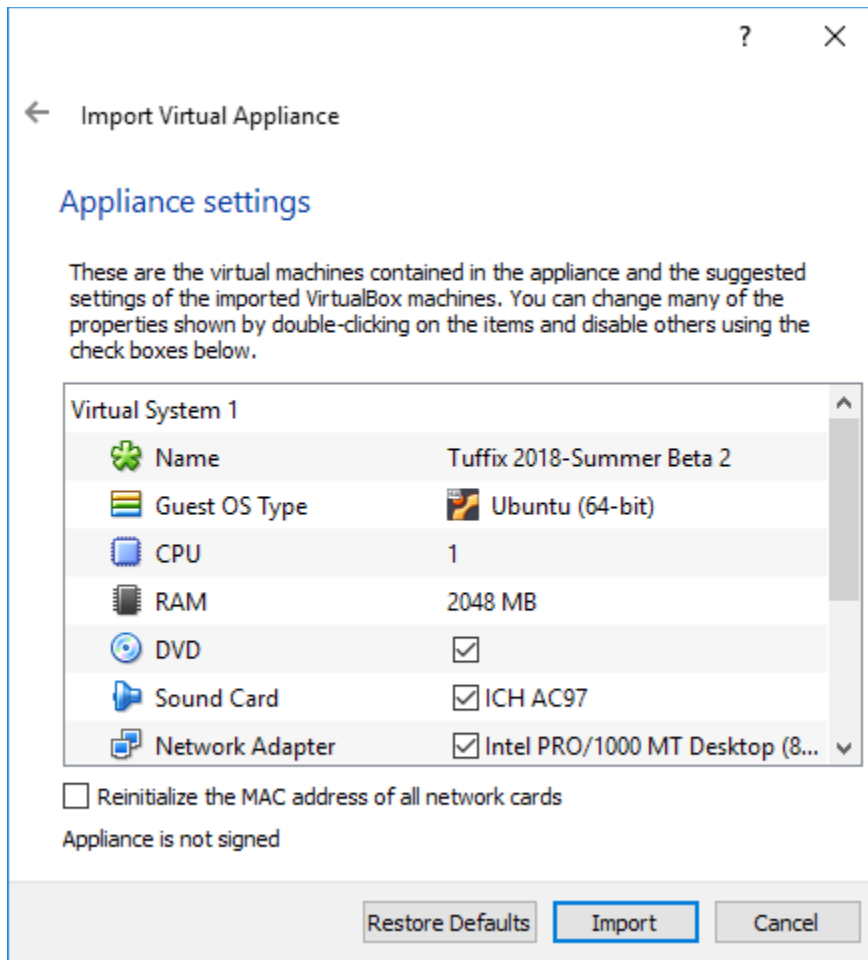

11. Click on "Import Appliance" and you will see a screen like this:

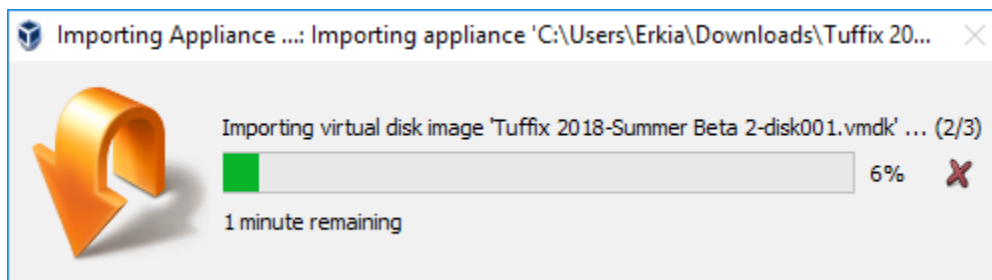

12. Navigate to where you downloaded the Tuffix File:

13. Once you click “Open”, this window will populate with the path (location) where your file is:

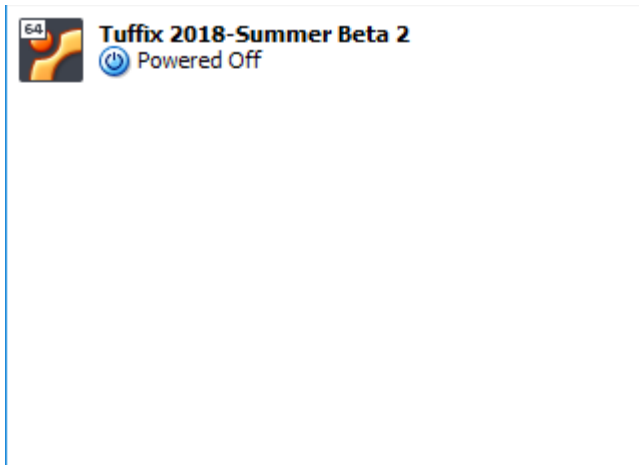

14. Press “Next” and you will be able to edit the settings of this Virtual Machine. Please leave them to the defaults if you don’t know what they are:

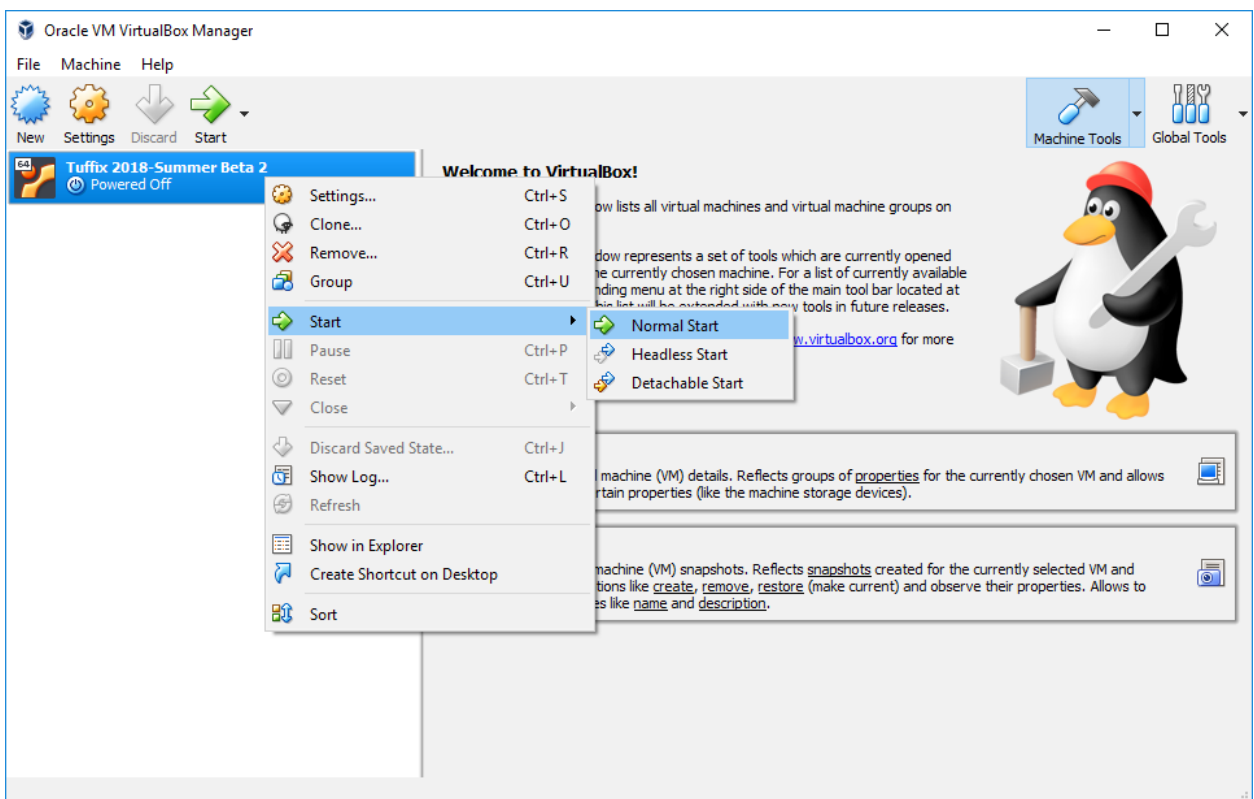

15. Clicking “Import” will bring you this dialog and this will take a while:

16. Once it is done, you should see this:

17. Right-click on the Virtual Machine and press Start → Normal and you're all done:

18. Proceed to [this document](#) for further information regarding Tuffix
